Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Unemployment Insurance and Manpower
Section,
Labour Division,

Statistics Canada, Ottawa, K1A 0T6 (telephone: 995-8445) or to a local Advisory Services office:

St. John's (Nfld.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnement et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section de l'assurance-chômage et de la
main-d'oeuvre,
Division du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-8445) ou à un bureau local des Services consultatifs situé aux endroits suivants:

St. John's (T.-N.)	(737-4073)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(359-5405)
Edmonton	(420-3027)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1(112)800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

HIGHLIGHTS

Contributors and Contributions(employees)(1)

- o The number of contributors to unemployment insurance rose from an estimated 8.95 million in 1972 to 10.57 million in 1978, an increase of 18%.
- o The distribution of the number of contributors by area in 1978 (1972 in parenthesis) is as follows: Atlantic provinces, 8% (same); Quebec, 26% (same) Ontario, 38% (40%); the Prairie provinces, 16% (15%) and British Columbia, 11% (same).
- o The amount of contributions increased from a total of \$289 million in 1972 to \$1,230 million in 1978, a rise of 326%. The rate of increase from year to year is as follows: from 1972 to 1973 - 40%; from 1973 to 1974 - 74%; from 1974 to 1975 - 20%; from 1975 to 1976 - 31%; from 1976 to 1977 - 1%; from 1977 to 1978 - 10%. During this span, the premiums for employees rose from 90¢ per \$100 of weekly insurable earnings to \$1.50 (up 67%) while the maximum weekly employee contributions advanced from \$1.35 to \$3.60 (up 167%).
- o Contributions by females accounted for 26% of the total in 1972 and increased to 33% of the total in 1978.
- o The 25 to 34 years of age group constituted the largest number and contributed the greatest amount in each of the seven years. The amount contributed by this group ranged from 27% of the total in 1972 to 31% in 1978.

Beneficiaries(2)

- o Persons benefitting from unemployment insurance numbered 1,904,000 in 1972 and 2,524,000 in 1978, up 33%. In 1972, beneficiaries comprised 21% of the total labour force and in 1978, 23%.
- o The distribution of beneficiaries by region in 1978 (1972 in parenthesis) is as follows: Quebec, 34% (29%); Ontario, 30% (33%); Atlantic provinces, 14% (12%); British Columbia, 12% (13%) and the Prairie provinces, 10% (13%).

- (1) In addition, employers contribute to unemployment insurance at the rate of 1.4 times the employee rate.
- (2) Benefit periods established in one year often terminate in the next year. The beneficiary of such a benefit period is counted in both years, whereas the claim established is only counted in the year of origin. Hence, the count of beneficiaries is always higher than the count of benefit periods established.

FAITS SAILLANTS

Cotisants et cotisations(salariés)(1)

- o Entre 1972 et 1978, le nombre de cotisants à l'assurance-chômage est passé de 8.95 millions à 10.57 millions (nombres estimatifs), ce qui représente une augmentation de 18%.
- o Voici la répartition du nombre de cotisants selon la région en 1978 (les chiffres pour 1972 figurent entre parenthèses): provinces de l'Atlantique 8% (même), Québec 26% (même), Ontario 38% (40%), provinces des Prairies 16% (15%) et Colombie-Britannique 11% (même).
- o Le montant total des cotisations est passé de \$289 millions en 1972 à \$1,230 millions en 1978, soit une progression de 326%. Les taux d'accroissement annuels sont les suivants: de 1972 à 1973 - 40%; de 1973 à 1974 - 74%; de 1974 à 1975 - 20%; de 1975 à 1976 - 31%; de 1976 à 1977 - 1%; et de 1977 à 1978 - 10%. Au cours de cette période, la cotisation versée par les salariés est passée de 90¢ à \$1.50 pour chaque tranche de \$100 de gains hebdomadaires assurables (hausse de 67%), et la cotisation hebdomadaire maximale par salarié est passée de \$1.35 à \$3.60 (augmentation de 167%).
- o En 1972, les cotisations versées par des femmes représentaient 26% du total, alors que la proportion s'établissait à 33% en 1978.
- o Le groupe des 25 à 34 ans était le plus nombreux et a versé le montant le plus important au cours de chacune des sept années. Le montant des cotisations versées par ce groupe intervenait pour 27% du total en 1972 et pour 31% en 1978.

Bénéficiaires(2)

- o Le nombre de bénéficiaires de prestations d'assurance-chômage s'est établi à 1,904,000 en 1972 et à 2,524,000 en 1978, soit une progression de 33%. Les bénéficiaires représentaient 21% de la population active totale en 1972 et 23% en 1978.
- o Voici la répartition des bénéficiaires par région en 1978 (les chiffres pour 1972 figurent entre parenthèses): Québec 34% (29%), Ontario 30% (33%), provinces de l'Atlantique 14% (12%), Colombie-Britannique 12% (13%) et provinces des Prairies 10% (13%).

- (1) Pour leur part, les employeurs contribuent à l'assurance-chômage à raison de 1.4 fois la cotisation des salariés.
- (2) Les périodes de prestations établies au cours d'une année donnée se terminent souvent l'année suivante. Le bénéficiaire pour lequel une telle période de prestations a été établie est compté les deux années, tandis que la demande de prestations n'est comptée que l'année où elle a été présentée. Par conséquent, le nombre de bénéficiaires est toujours supérieur au nombre de périodes de prestations établies.

- o In 1978 (1972 in parenthesis), 37% (36%) of the beneficiaries were under 25 years of age, 42% (39%) were between 25 and 44 years and 21% (25%) were over 44 years.

Benefit Periods Established(3)

- o Some 2.1 million benefit periods for unemployment insurance claimants were established in 1978, up 11% from 1.9 million allowed in 1972.
- o In 1978, 84% of the periods established were for regular benefits compared with 88% in 1972.

Benefit Periods Terminated

- o Benefit periods terminating in 1978 totaled 2.21 million, an increase of 15% from the 1.92 million terminating in 1973. In 1972, the number of terminations amounted to 944,000, less than 50% of those in 1973. A substantial number of benefit periods terminating in a year are established in the previous year. Because coverage was increased greatly in 1972, the carryover of benefit periods from 1971 to 1972 was relatively low compared to carryovers in subsequent years; hence, benefit periods terminated in 1972 were much lower than in later years.
- o The average number of weeks on claim per benefit period in 1972 was 20.6; from 1973 to 1977 the number ranged from 16.0 to 17.6 weeks while in 1978 the average was 19.3 weeks.
- o The average weekly benefit rose from \$58.54 in 1972 to \$102.42 in 1978, an increase of 75%. During the same period, the average amount of benefits paid per claim was up 64% from \$1,205 to \$1,973.

(3) Benefit periods established in one year often terminate in the next year. The beneficiary of such a benefit period is counted in both years, whereas the claim established is only counted in the year of origin. Hence, the count of beneficiaries is always higher than the count of benefit periods established.

- o En 1978 (1972 entre parenthèses), 37% (36%) des bénéficiaires avaient moins de 25 ans, 42% (39%) avaient entre 25 et 44 ans et 21% (25%) avaient plus de 44 ans.

Périodes de prestations établies(3)

- o En 1978, 2.1 millions de périodes de prestations ont été établies pour les prestataires de l'assurance-chômage, ce qui représente une hausse de 11% par rapport à 1972 (1.9 million).
- o En 1978, 84% des périodes de prestations établies l'ont été pour des prestations ordinaires, contre 88% en 1972.

Périodes de prestations terminées

- o En 1978, le nombre de périodes de prestations terminées s'est chiffré à 2.21 millions, ce qui représente une augmentation de 15% par rapport à 1973 (1.92 million). En 1972, le nombre de périodes de prestations terminées s'est établi à 944,000, soit moins de 50% du nombre de périodes terminées en 1973. Un grand nombre des périodes de prestations terminées au cours d'une année donnée ont été établies l'année précédente. Étant donné que la population assurée a beaucoup augmenté en 1972, le chevauchement des périodes de prestations entre 1971 et 1972 a été relativement peu important en comparaison des années antérieures; ainsi, beaucoup moins de périodes de prestations se sont terminées en 1972 qu'au cours des années ultérieures.
- o Entre 1972, le nombre moyen de semaines de prestations par période de prestations s'est établi à 20.6; entre 1973 et 1977, il s'est échelonné de 16.0 à 17.6, et il s'est chiffré à 19.3 en 1978.
- o Entre 1972 et 1978, la prestation hebdomadaire moyenne est passée de \$58.54 à \$102.42, ce qui représente une augmentation de 75%. Au cours de la même période, le montant moyen des prestations versées par demande a progressé de 64%, passant de \$1,205 à \$1,973.

(3) Les périodes de prestations établies au cours d'une année donnée se terminent souvent l'année suivante. Le bénéficiaire pour lequel une telle période de prestations a été établie est compté les deux années, tandis que la demande de prestations n'est comptée que l'année où elle a été présentée. Par conséquent, le nombre de bénéficiaires est toujours supérieur au nombre de périodes de prestations établies.

(1) Comprend les données sur les périodes de prestations ordinaires terminées pour les prestataires de l'extérieur du Canada.

General

The mandate for the compilation of unemployment insurance statistics was given to Statistics Canada by a 1941 order-in-council. Monthly data have been published since 1942 in the monthly **Preliminary Unemployment Insurance Statistics** (Catalogue 73-001P) and quarterly in the **Statistical Report on the Operation of the Unemployment Insurance Act** (Catalogue 73-001). Annual data on contributors, benefit periods established and benefit periods terminated were published in the **Benefit Periods Established and Terminated under the Unemployment Insurance Act** (Catalogue 73-201). Due to considerable changes effected by the new unemployment insurance act in 1971 and the rescheduling of priorities, it has not been possible to obtain annual data since the last published report in 1971. This catalogue comprises statistics from 1972 to 1978 and hereafter will be published annually.

Sources of Data and Coverage

The Unemployment Insurance Act, 1971 covers virtually all paid workers in the labour force and members of the Armed Forces. The main exceptions are low paid workers, for example, those earning less than \$48 in 1978 and persons 70 years of age and over (reduced to 65 years in 1976). In order to qualify for benefits, a claimant must be available for and capable of work, unable to find suitable employment and have the necessary qualifying requirements.

Effective December 4, 1977, a variable entrance of 10 to 14 weeks of insurable employment was introduced for persons applying for benefits. The number of weeks required to qualify for benefits relates to the rate of unemployment prevailing in the region of residence of the claimant. For example, a person residing in a region with an unemployment rate of over 9% would need 10 weeks of insurable employment to qualify; a rate of 6% or less increases the number of necessary qualifying weeks of insurable employment to 14. Previously, eight weeks was the minimum required to qualify for benefits regardless of the rate of unemployment.

Data in this report consist of four main parts: (a) contributors (b) beneficiaries (c) benefit periods established and (d) benefit periods terminated. The statistics are based on a 10% sample of those contributors and claimants whose Social Insurance Number ends with "5". It excludes claims

Généralités

La responsabilité de compiler des statistiques sur l'assurance-chômage a été confiée par décret à Statistique Canada en 1941. Depuis 1942, des données mensuelles ont été publiées dans le bulletin mensuel **Statistiques provisoires sur l'assurance-chômage** (n° 73-001P au catalogue) et dans le bulletin trimestriel **Rapport statistique sur l'application de la Loi sur l'assurance-chômage** (n° 73-001 au catalogue). Des données annuelles sur les cotisants et sur les périodes de prestations établies et terminées paraissent dans la publication **Périodes de prestations établies et terminées aux termes de la Loi sur l'assurance-chômage** (n° 73-201 au catalogue). En raison des modifications importantes apportées par la nouvelle Loi sur l'assurance-chômage en 1971 et du remaniement des priorités, il a été impossible d'obtenir des données annuelles depuis la publication du dernier bulletin en 1971. La présente publication contient des statistiques pour la période allant de 1972 à 1978; les bulletins ultérieurs présenteront des données annuelles.

Source des données et champ d'observation

La loi sur l'assurance-chômage de 1971 vise pratiquement tous les travailleurs rémunérés dans la population active et les membres des Forces armées. Les principales exceptions sont les petits salariés (par exemple, ceux qui gagnaient moins de \$48 en 1978) et les personnes de 70 ans et plus (limite abaissée à 65 ans en 1976). Pour avoir droit aux prestations, un prestataire doit être prêt et apte à travailler, incapable de trouver un emploi convenable et répondre aux conditions d'admissibilité.

Depuis le 4 décembre 1977, toute personne qui fait une demande de prestations doit justifier de 10 à 14 semaines d'emploi assurable. Le nombre de semaines de travail exigées pour être admissible aux prestations est fondé sur le taux de chômage dans la région où réside le prestataire. Par exemple, une personne qui habite dans une région où le taux de chômage est supérieur à 9% doit justifier de 10 semaines d'emploi assurable pour être admissible aux prestations; si le taux de chômage est de 6% ou moins, le prestataire doit justifier de 14 semaines d'emploi assurable. Auparavant, il suffisait d'avoir travaillé pendant au moins huit semaines pour avoir droit aux prestations.

Les données présentées dans ce bulletin se divisent en quatre parties principales: a) les cotisants, b) les bénéficiaires, c) les périodes de prestations établies et d) les périodes de prestations terminées. Les statistiques sont fondées sur un échantillon de 10% des cotisants et des prestataires dont le numéro d'assurance

handled entirely within the "manual pay system" of the Canada Employment and Immigration Commission such as year-round fishermen.

The contribution data were supplied by Revenue Canada, Taxation from T4 Supplementary (T4S) returns submitted annually by employers for each employee showing the amount deducted for unemployment insurance.

The beneficiary, benefit periods established and terminated data were furnished by the Canada Employment and Immigration Commission from complete files maintained for each claimant.

Sample Design

The statistics given in this report are based on a sample of contributors and claimants. This sample has been selected by collecting all information on contributors and claimants whose Social Insurance Number has a "5" as the ninth (last) digit, from the sources as indicated above. A detailed review by Statistics Canada has verified that, under this selection technique, a sample with the properties of a random sample is generated.

Since the data in this publication are based on this 10% sample, all figures shown should be viewed as estimates, each having an associated sampling error. Estimates for totals are produced by multiplying the total derived from the sample by the inverse of the probability of selection; that is, in this case, by "10". Averages shown are the averages as calculated directly from the sample information.

Reliability of Estimates

Estimates based on a selected sample of records may differ from the figures that would have been obtained had a complete census of records been taken. The standard error is primarily used as the measure of this sampling variability - that is, of variations that occur because a sample rather than the whole population is surveyed. Normally, the chances are about two in three that the differences between the estimate and the corresponding census figure would be less than one standard error and about 19 in 20 that this difference would be less than two standard errors.

sociale se termine par un "5". L'échantillon ne prend pas en compte les personnes comme les pêcheurs à l'année dont les demandes sont entièrement traitées par le "système de paye manuel" de la Commission de l'emploi et de l'immigration du Canada.

Les données sur les cotisations ont été fournies par Revenu Canada (Impôt) et sont tirées des feuillets T4 supplémentaires (T4S) présentés chaque année par les employeurs pour chaque salarié et sur lesquels figurent les sommes retenues au titre de l'assurance-chômage.

Les données sur les bénéficiaires et sur les périodes de prestations établies et terminées ont été fournies par la Commission de l'emploi et de l'immigration du Canada et proviennent de dossiers complets tenus pour chaque prestataire.

Plan de sondage

Les statistiques présentées dans ce bulletin sont basées sur un échantillon de cotisants et de prestataires. L'échantillon a été prélevé en tirant des sources précitées tous les renseignements concernant les cotisants et les prestataires dont le numéro d'assurance sociale se termine par un "5" (neuvième chiffre). Une étude détaillée effectuée par Statistique Canada a révélé que l'échantillon tiré à l'aide de cette technique de sélection a un caractère aléatoire.

Comme les valeurs présentées ici sont calculées à partir de cet échantillon représentant 10% de la population, on doit les considérer comme des estimations, chacune étant sujette à sa propre erreur d'échantillonnage. On peut établir des estimations des totaux en multipliant le total calculé à partir de l'échantillon par l'inverse de la probabilité de sélection, c'est-à-dire par "10" dans ce cas-ci. Les moyennes indiquées ont été directement calculées à partir des renseignements fournis par l'échantillon.

Fiabilité des estimations

Les estimation fondées sur un échantillon peuvent être différentes des valeurs qu'on aurait obtenues si l'on avait fait un recensement complet. L'erreur type sert principalement de mesure de la variabilité d'échantillonnage, c'est-à-dire des variations qui se produisent lorsqu'on procède par échantillonnage plutôt que par un recensement de toute la population. Normalement, il y a environ deux chances sur trois que la différence entre l'estimation-échantillon et la valeur-recensement correspondante soit inférieure à une fois l'erreur type, et environ 19 chances sur 20 qu'elle ne dépasse pas deux fois l'erreur type.

Non-sampling errors, errors which are not related to sampling error, may also occur for a number of reasons such as processing errors, incorrect recording of information, etc., but it is not expected that these errors will significantly alter the findings in this survey.

Standard errors associated with any estimate of total number of claimants and contributors can be made available by contacting Statistics Canada. Standard errors for dollar figures and averages are not available.

Benefits and Insurable Earnings

From July 1, 1971 to January 7, 1979, the benefit rate for all claims is two thirds(1) of the average weekly insurable earnings in the qualifying period. A ceiling for insurable earnings is calculated each year by using the base year 1972 amount of \$150 multiplied by an annual Earnings Index as determined by the wages and salaries paid in Canada. A table elsewhere in these notes provides data on contributions, insurable earnings and maximum weekly benefit from 1972 to 1978.

A claimant on regular benefit is allowed to have work-related income up to 25% of the weekly benefit without reduction of benefits.

Persons with 20 or more weeks of insurable employment (so-called major attachment claimants) in the qualifying period are eligible for a wider range of benefits which include sickness, maternity and retirement payments.

All claimants must serve a two-week waiting period before benefits become payable.

From 1972 to September 10, 1977, the benefit structure consisted of five phases - an initial benefit period (benefits paid up to 15 weeks), a re-established initial benefit period (up to 10 weeks), a labour

(1) From 1972 to 1975, the benefit rate was 75% for claimants with dependents and whose average qualifying earnings are equal to or less than one third of the maximum weekly insurable earnings. In the third phase of the extended benefit period, the rate was 75% for claimants with a dependent regardless of insurable earnings.

Des erreurs non dues à l'échantillonnage peuvent également se glisser dans les estimations, par exemple des erreurs de traitement, l'inscription erronée des renseignements, etc., mais on ne s'attend pas à ce qu'elles modifient sensiblement les résultats de cette enquête.

On peut connaître les erreurs types relatives à toute estimation du nombre total de prestataires et de cotisants en s'adressant à Statistique Canada. Elles ne sont toutefois pas disponibles pour ce qui concerne les chiffres en dollars et les moyennes.

Prestations et gains assurables

Du 1^{er} juillet 1971 au 7 janvier 1979, le taux de prestations relatif à toutes les demandes correspondait aux deux tiers(1) de la moyenne des gains hebdomadaires assurables au cours de la période de référence. On établit chaque année un plafond des gains assurables en utilisant comme base le montant fixé en 1972, soit \$150, multiplié par un indice annuel des gains déterminé en fonction des salaires et traitements versés au Canada. On trouvera ailleurs dans ces notes un tableau présentant des données sur les cotisations, les gains assurables et les prestations hebdomadaires maximum de 1972 à 1978.

Un bénéficiaire touchant des prestations ordinaires peut tirer de son travail un revenu qui ne dépasse pas 25% de la prestation hebdomadaire sans voir ses prestations réduites.

Les personnes justifiant de 20 semaines d'emploi assurable ou plus (appelées prestataires de la première catégorie) au cours de la période de référence ont droit à un plus grand éventail de prestations, notamment des prestations de maladie, de maternité et de retraite.

Un délai de carence de deux semaines doit s'écouler avant que les prestataires commencent à toucher leurs prestations.

De 1972 au 10 septembre 1977, la période de prestations était divisée en cinq phases - une période de prestations initiales (jusqu'à 15 semaines), une période de prestations initiales renouvelées (jusqu'à 10 semaines), une période de

(1) De 1972 à 1975, le taux de prestations correspondait à 75% de la moyenne des gains hebdomadaires assurables dans le cas des prestataires ayant des personnes à charge et dont les gains admissibles moyens étaient égaux ou inférieurs au tiers du maximum des gains hebdomadaires assurables. Au cours de la troisième partie de la période de prestations complémentaires, le taux s'établissait à 75%, sans égard au montant des gains assurables, pour les prestataires ayant une personne à charge.

force extended phase (up to 18 weeks), a national extended phase (up to 8 weeks) and a regional extended phase (up to 18 weeks). The maximum number of weeks for which benefit may be paid was 51 weeks. From September 11, 1977 a three phase benefit structure was adopted, as follows: an initial benefit phase (up to 25 weeks), a labour force extended phase (up to 13 weeks) and a regional extended phase (up to 32 weeks). The maximum payout was reduced to 50 weeks. This period could be increased in the case of claimants participating in developmental programs such as training.

Financing

A tripartite system of premiums has been established whereby employers, employees and the federal government contribute to pay for the cost of the Unemployment Insurance program.

The rate of premium for any given year is set as a percentage of insurable earnings in the year. In 1978, for example, the employee rate is 1.5% of weekly insurable earnings. Therefore, on maximum weekly insurable earnings of \$240, the top employee premium is \$3.60. The employer pays 1.4 times the employee rate. The following table shows details since 1972:

prestations complémentaires en raison de la catégorie d'activité (jusqu'à 18 semaines), une période de prestations complémentaires à l'échelle nationale (jusqu'à 8 semaines) et une période de prestations complémentaires selon la région (jusqu'à 18 semaines). Le nombre maximum de semaines pendant lesquelles des prestations peuvent être versées était fixé à 51 semaines. Depuis le 11 septembre 1977, une période de prestations en trois phase a été adoptée: une période de prestations initiales (jusqu'à 25 semaines), une période de prestations complémentaires en raison de la catégorie d'activité (jusqu'à 13 semaines) et une période de prestations complémentaires selon la région (jusqu'à 32 semaines). Le nombre maximum de semaines de prestations a été réduit à 50. Cette période peut être prolongée dans le cas des prestataires qui participent à des programmes expérimentaux tels que les programmes de formation.

Financement

Un système tripartite de cotisation a été mis en oeuvre, selon lequel les employeurs, les salariés et l'administration fédérale participent au financement du programme d'assurance-chômage.

Le taux de cotisation pour une année donnée est calculé en pourcentage des gains assurables au cours de l'année. En 1978, par exemple, le taux de cotisation des salariés s'établissait à 1.5% des gains hebdomadaires assurables. Par conséquent, pour le maximum des gains hebdomadaires assurables, soit \$240, le salarié payait une cotisation de \$3.60. La contribution de l'employeur est égale à 1.4 fois la cotisation du salarié. Le tableau qui suit donne les détails depuis 1972:

	1972	1973	1974	1975	1976	1977	1978
	dollars						
Premium rate per \$100.00 of weekly earnings - Taux de cotisation pour \$100.00 de gains hebdomadaires	0.90	1.00	1.40	1.40	1.65	1.50	1.50
Maximum weekly insurable earnings - Maximum des gains hebdomadaires assurables	150.00	160.00	170.00	185.00	200.00	220.00	240.00
Maximum weekly contributions - Maximum des cotisations hebdomadaires	1.35	1.60	2.38	2.59	3.30	3.30	3.60
Maximum weekly benefit - Maximum des prestations hebdomadaires	100.00	107.00	113.00	123.00	133.00	147.00	160.00

Terms and Definitions

Contributor

This represents a person in insurable employment for whom deductions from earnings are made for unemployment insurance in a given year. Employers submit annually to Revenue Canada, Taxation, a T4S slip showing the amount deducted for each employee.

An estimate is also made monthly in the catalogue reports 73-001P and 73-001 of **Persons Exposed to Unemployment Insurance (Insured Population)**. This estimate is based mainly on data from the Labour Force Survey comprising paid workers (employed and unemployed) from the ages of 15 to 70 (65 years since 1976).

The labour force derived estimates (taking the greatest number in a month in any given year) tend to be lower than those from Revenue Canada as, apart from source and definition differences, the labour force estimate is at a point in time - a specific week for a certain month - while the Revenue Canada estimate is an unduplicated count of contributors for a given year of any individual who worked for wages or salaries at any time during the year.

Beneficiary

This represents the number of persons receiving \$1.00 or more of unemployment insurance benefit in a given year. This is an unduplicated count of beneficiaries for the calendar year and should not be compared with the monthly count of beneficiaries published in catalogues 73-001P or 73-001 as the latter count is based on the number of persons drawing benefit for a specific week each month.

Benefit Period Established (BPE)

A benefit period is established for a claimant which denotes the existence of benefit rights if there is an interruption of earnings and sufficient number of weeks of insurable employment in the qualifying period. It does not necessarily follow that a BPE for a person means that benefit payments have been made. In some cases, persons are disqualified or disentitled and may not draw any benefit or may have found work before benefits become payable.

Termes et définitions

Cotisant

Ce terme désigne une personne ayant un emploi assurable et pour laquelle des retenues sur les gains sont prélevées au titre de l'assurance-chômage au cours d'une année donnée. Chaque année, les employeurs présentent à Revenu Canada (Impôt) un feuillet T4S indiquant le montant retenu pour chaque salarié.

Les publications n^{os} 73-001P et 73-001 au catalogue présentent également chaque mois une estimation des **Personnes contribuant à l'assurance-chômage (population assurable)**. Cette estimation est fondée principalement sur les données de l'enquête sur la population active visant les travailleurs rémunérés (personnes occupées et chômeurs) de 15 à 70 ans (65 ans depuis 1976).

Les estimations produites à partir de l'enquête sur la population active (fondées sur le nombre le plus élevé observé au cours d'un mois d'une année donnée) tendent à être inférieures à celles de Revenu Canada car, outre les différences au chapitre de la source et des définitions, l'estimation de l'enquête sur la population active est établie à un moment déterminé - une semaine précise d'un mois donné - tandis que celle de Revenu Canada est produite sans doubles comptes et représente, pour une année donnée, le nombre de cotisants qui ont travaillé contre rémunération à un moment quelconque au cours de l'année.

Bénéficiaires

Il s'agit du nombre de personnes qui touchent des prestations d'assurance-chômage de \$1.00 ou plus au cours d'une année. C'est le nombre, sans double compte, de bénéficiaires au cours de l'année civile; il ne doit pas être comparé au nombre mensuel de bénéficiaires publié dans les bulletins n^{os} 73-001P ou 73-001 au catalogue, car ce dernier chiffre est fondé sur le nombre de personnes qui touchent des prestations pendant une semaine précise chaque mois.

Période de prestations établie (PPE)

Une période de prestations est établie à l'égard d'un prestataire qui a droit aux prestations parce que ses gains sont interrompus et parce qu'il justifie d'un nombre suffisant de semaines d'emploi assurable au cours de la période de référence. Cela ne signifie pas nécessairement que la personne pour laquelle une période de prestations a été établie a touché des prestations. Dans certains cas, les personnes sont exclues ou inadmissibles et ne peuvent toucher de prestations, ou elles ont trouvé un emploi avant que les prestations commencent à être versées.

The number of benefit periods established is not synonymous with the number of claimants establishing benefit periods. A claimant may establish more than one benefit period in a calendar year.

Benefit Period Terminated (BPT) or Terminated Claim

A benefit period terminates when benefit is no longer payable. This occurs when a claimant has received all the benefits to which he or she is entitled or the period during which benefit is payable has ended.

A claim terminating in a particular year may have been established in a previous year.

Interruption of Earnings

This term means that interruption occurring in the earnings of an insured person when after a period of employment with an employer the insured person has a lay-off or separation from the employment or a reduction in hours for that employer resulting in a prescribed reduction in earnings.

Qualifying Period

The qualifying period of an insured person is generally the 52 weeks which immediately precede the commencement of a benefit period.

Type of Benefit

When the interruption of earnings is directly related to employment (e.g., shortage of work) the type of benefit period established is regular. When the interruption is caused by illness, the benefit type is sickness. Similarly pregnancy will result in maternity benefit. Persons reaching the age of 65 are entitled to retirement benefit, whether or not there has been an interruption of earnings. (At age 65, coverage for unemployment insurance ceases.)(2)

Seasonal fishing benefit is payable to claimants who fail to qualify for regular benefit, but have a sufficient number of weeks of insurable employment which include some fishing insured weeks.

(2) Prior to 1976, retirement benefit was payable to "a claimant who is 70 years of age or over or to whom a retirement pension has at any time become payable under the Canada Pension Plan or Quebec Pension Plan, at which time contributions and benefit entitlement ceases".

Le nombre de périodes de prestations établies ne correspond pas au nombre de prestataires qui établissent des périodes de prestations. Un prestataire peut établir plus d'une période de prestations au cours d'une année civile.

Période de prestations terminée (PPT)

Une période de prestations prend fin lorsqu'il n'y a plus lieu de verser les prestations. Cela se produit lorsque le bénéficiaire a touché toutes les prestations auxquelles il avait droit ou lorsque la période de prestations est terminée.

Une période de prestations qui prend fin au cours d'une année donnée peut avoir été établie au cours d'une année antérieure.

Interruption des gains

Ce terme désigne l'interruption des gains d'une personne assurée lorsque cette dernière est mise à pied après une période d'emploi chez un employeur ou que ses heures de travail chez cet employeur sont réduites, ce qui entraîne une réduction prescrite des gains.

Période de référence

En règle générale, la période de référence d'une personne assurée représente les 52 semaines qui précèdent le début d'une période de prestations.

Genre de prestations

Lorsque l'interruption des gains est directement liée à l'emploi (par ex., une pénurie de travail), une période de prestations ordinaires est établie. Si l'interruption est attribuable à la maladie ou à une grossesse, il s'agit de prestations de maladie ou de maternité. Les personnes qui atteignent l'âge de 65 ans sont admissibles aux prestations de retraite, qu'elles aient ou non subi une interruption de leurs gains. (À 65 ans, le travailleur n'est plus assuré(2)).

Des prestations de pêche saisonnières sont versées aux prestataires qui ne sont pas admissibles aux prestations ordinaires, mais qui justifient d'un nombre suffisant de semaines d'emploi assurable comprenant quelques semaines de travail assurable dans le domaine de la pêche.

(2) Avant 1976, des prestations de retraite étaient versées aux prestataires de 70 ans et plus ou à ceux qui étaient devenus admissibles à une pension de retraite en vertu du Régime de pensions du Canada ou du Régime de rentes du Québec; à ce moment-là, ces prestataires n'étaient plus assurés.

When a benefit period is established, the claim type assigned depends upon the reason for the interruption of earnings. However, a claimant may be paid more than one type of benefit during a claim. For example, regular and sickness, or sickness and maternity benefit may be paid. Table 11 shows claims on which only one type of benefit has been paid, and more than one type of benefit occurs (mixed type).

Age

The age of a person is calculated by deducting the last two digits of the year of birth from the observation year, minus one. For example, a person born in 1940 would be 37 years of age in 1978.

Claimant

Since revision of the Act in July 1977, a claimant is defined as a person who applies or has applied for benefit. Prior to this date, a claimant meant an insured person who has applied for or is in receipt of benefit.

Benefit Payments

Amount of benefit paid. This represents the total amount of all benefit payments for the terminated claim including deductions for income tax.

Number of weeks of benefit paid. This represents the total number of weeks of benefits paid for the terminated claim including full and partial weeks

Average number of weeks. Is calculated by dividing the total number of weeks of benefits paid by the number of terminated claims.

Average weekly benefit. Is calculated by dividing the total amount of benefit payments for terminated claims by the number of weeks of benefit paid.

Average amount of benefit. Is calculated by dividing the total amount of benefit payments for terminated claims by the number of terminated claims.

Lorsqu'une période de prestations est établie, le genre de la demande est déterminé en fonction de la raison de l'interruption des gains. Un bénéficiaire peut toutefois toucher plus d'un genre de prestations pendant une même période. Par exemple, des prestations ordinaires et de maladie, ou de maladie et de maternité, peuvent être versées pendant une même période. Le tableau 11 indique le nombre de demandes à l'égard desquelles a) un seul genre de prestations ont été versées et b) plus d'un genre de prestations ont été versées (formule mixte).

Âge

L'âge d'une personne est calculé en soustrayant de l'année observée les deux derniers chiffres de l'année de naissance, moins un. Par exemple, une personne née en 1940 aurait 37 ans en 1978.

Prestataire

Depuis que la Loi a été modifiée en 1977, un prestataire est une personne qui demande ou a demandé des prestations. Avant cette date, le terme "prestataire" désignait une personne assurée qui avait demandé des prestations ou qui en touchait.

Versement des prestations

Montant des prestations versées. Il s'agit du montant total de toutes les prestations versées au cours de la période de prestations terminée, y compris les retenues pour fins d'impôt sur le revenu.

Nombre de semaines de prestations versées. Il s'agit du nombre total de semaines de prestations versées au cours de la période de prestations terminée, y compris les semaines complètes et partielles.

Le nombre moyen de semaines. Est calculé en divisant le nombre total de semaines de prestations versées par le nombre de périodes de prestations terminées.

La prestation hebdomadaire moyenne. Est calculée en divisant le montant total des prestations versées au cours des périodes terminées par le nombre de semaines de prestations versées.

La prestation moyenne. Est calculée en divisant le montant total des prestations versées au cours des périodes terminées par le nombre de périodes terminées.

Major Changes in the Unemployment insurance program from 1972 to 1978 are detailed below:

Maximum age for insurability:

Originally - 70 years of age or entitled to CPP or QPP
Change - January 1, 1976 to 65 years.

Minimum number of insured weeks to qualify for benefits:

Originally - 8 weeks
Change - December 4, 1977 to 10-14 weeks depending on unemployment rate in the region of domicile.

Maximum number of weeks for which benefit paid:

Originally - 51 weeks
Change - September 11, 1977 to 50 weeks.

Les modifications importantes apportées au programme d'assurance-chômage de 1972 à 1978 sont décrites ci-dessous:

Limite d'âge pour être admissible aux prestations:

À l'origine - 70 ans, ou admissibilité au RPC ou au RRQ
Modification - Depuis le 1^{er} janvier 1976, 65 ans.

Nombre minimum de semaines d'emploi assurable pour être admissible aux prestations:

À l'origine - 8 semaines
Modification - Depuis le 4 décembre 1977, de 10 à 14 semaines, selon le taux de chômage dans la région de résidence.

Nombre maximum de semaines de prestations versées:

À l'origine - 51 semaines
Modification - Depuis le 11 septembre 1977, 50 semaines.

TEXT TABLE I. Benefit Phases

TABLEAU EXPLICATIF I. Phases de la période de prestations

	Originally	Change September 11, 1977
	À l'origine	Modification depuis le 11 septembre 1977
	weeks - semaines	
Initial benefit period - Période de prestations initiales	8-15	10-25
Re-established initial benefit period - Période de prestations initiales renouvelées	10	(1)
Labour force extended - Période de prestations complémentaires en raison de la catégorie d'activité	2-18	1-13
National extended - Période de prestations complémentaires à l'échelle nationale	4-8	(1)
Regional extended - Période de prestations complémentaires selon la région	6-18	2-32

(1) Deleted.

(1) Supprimée.

Number of Regions for Extended Benefit:

Originally - 16 regions

Change - November 11, 1978 to 48 regions. These regions are based on the Labour Force Survey regions.

Nombre de régions bénéficiant de prestations complémentaires:

À l'origine - 16 régions

Modification - Depuis le 11 novembre 1978, 48 régions. Ces régions sont celles qui sont utilisées aux fins de l'enquête sur la population active.

TEXT TABLE II. Special Benefits

TABLEAU EXPLICATIF II. Prestations spéciales

	Originally	Change
	À l'origine	Modification depuis le 1 ^{er} janvier 1976
Sickness - Maladie	Maximum 15 weeks - Maximum de 15 semaines	Increased flexibility - Souplesse accrue
Maternity - Maternité	Maximum 15 weeks - Maximum de 15 semaines	Increased flexibility (effective January 30, 1976) - Souplesse accrue (depuis le 30 janvier 1976)
Retirement - Retraite	3 weeks - semaines	No change - Aucune modification
Fishing (seasonal) - Pêche (prestations saisonnières)	Available from Dec. 1 - May 15 - En vigueur du 1 ^{er} déc. au 15 mai	Available from Nov. 1 - May 15 (effective November 1, 1976). Also became entitled to regional extended benefits - En vigueur du 1 ^{er} nov. au 15 mai (depuis le 1 ^{er} novembre 1976). Les bénéficiaires sont également admissibles aux prestations complémentaires accordées selon la région.

Benefit Rate - Percentage of weekly insurable earnings:

Originally - 66 2/3% generally: 75% for claimants with low earnings and dependents and for claimants with dependents in the later stages of benefit.

Change - January 1, 1976 eliminated 75% rate.

Taux de prestations - Pourcentage des gains hebdomadaires assurables:

À l'origine

- En règle générale, 66 2/3%: 75% dans le cas des personnes à faible revenu ayant des personnes à charge et, dans la dernière phase de la période de prestations, pour les prestataires ayant des personnes à charge.

Modification

- Depuis le 1^{er} janvier 1976, le taux de 75% a été supprimé.

Disqualification:

Originally - 3 weeks maximum if due to misconduct or voluntary quit without just cause.

Change - January 1, 1976 increased to 6 weeks maximum.

Four weeks rule:

Originally - A re-established initial benefit period terminated if no benefits were payable for a period of 4 consecutive weeks other than:

- (a) incapable of work because of illness or injury,
- (b) disentitled to benefit - maternity claim,
- (c) fully employed during such period and,
- (d) recovery of overpayment.

With the exception of (c) above, the same conditions referred to the termination of an extended benefit period.

Change - September 11, 1977. Initial claims which would have terminated under the 4-week rule could now be renewed.

Statistics on duration of claim are affected by this change.

Availability of Data

Unpublished tabulations on hand may be obtained from Statistics Canada with minimal charge. However, special tabulations requiring computer time may be available on a cost recovery basis.

Publications

In addition to this annual publication, Statistics Canada releases monthly data in three publications:

The Statistics Canada Daily. Each month, data are available within 60 days after the month of reference. As only summary statistics are presented in the Daily, additional data may be obtained by calling Statistics Canada at 613-995-8445.

Personnes exclues:

À l'origine - Maximum de 3 semaines si la personne a perdu son emploi pour inconduite ou si elle l'a quitté sans juste raison.

Modification - Depuis le 1^{er} janvier 1976, ce délai a été porté à 6 semaines au maximum.

Règle des quatre semaines:

À l'origine - Une période de prestations initiales terminée était ré-établie si aucune prestation n'était payable pendant une période de 4 semaines consécutives autrement qu'en raison:

- a) d'une incapacité de travailler attribuable à la maladie ou à une blessure,
- b) d'une inadmissibilité aux prestations - demandes de prestations de maternité,
- c) d'un emploi à temps plein au cours de cette période et,
- d) d'une perception d'un paiement en trop.

À l'exception de c) ci-dessus, les mêmes conditions s'appliquaient à une période de prestations complémentaires terminée.

Modification - Depuis le 11 septembre 1977, les prestations initiales qui auraient pris fin en vertu de la règle des 4 semaines peuvent être renouvelées.

Cette modification a un effet sur les statistiques concernant la durée de la période de prestations.

Disponibilité des données

Statistique Canada peut fournir, moyennant des frais minimes, des totalisations inédites déjà établies. Toutefois, on peut obtenir, contre recouvrement des frais, des totalisations spéciales nécessitant des calculs informatiques.

Publications

Outre cette publication annuelle, Statistique Canada fait paraître des données mensuelles dans trois bulletins:

Le Quotidien de Statistique Canada. Chaque mois, des données paraissent dans les 60 jours suivant le mois de référence. Comme le Quotidien ne présente que des statistiques sommaires, on peut obtenir d'autres données en s'adressant à Statistique Canada (613-995-8445).

Preliminary Unemployment Insurance Statistics. This report is published each month as Catalogue 73-001P. It contains more detailed data and is usually available two weeks after the release of summary statistics in the Daily.

Statistical Report on the Operation of the Unemployment Insurance Act. This report is published quarterly as Catalogue 73-001. It is available about 3½ months after the last month in the quarter and contains final data and additional information.

The last quarterly issue in each year gives a historical statistical review since the inception of the Unemployment Insurance Act in the 1940's.

Statistiques provisoires sur l'assurance-chômage. Ce bulletin est publié chaque mois et porte le numéro 73-001P au catalogue. Il contient des données détaillées et paraît généralement deux semaines après la publication des statistiques sommaires dans le Quotidien.

Rapport statistique sur l'application de la Loi sur l'assurance-chômage. Ce bulletin trimestriel porte le numéro 73-001 au catalogue. Il paraît environ trois mois et demi après le dernier mois d'un trimestre et contient des données définitives et des renseignements supplémentaires.

Le dernier numéro trimestriel de chaque année présente une revue chronologique statistique de l'assurance-chômage depuis l'entrée en vigueur de la Loi dans les années 40.
